

OLYMPUS

A token born from legends - fit for the gods.

From the creators of BogTools, Gabe, and Bingus, Olympus boasts the first dual BUSD-Reflect and whale buyback system, with dynamically pegged auto-liquidity generation, anti-snipe, and anti-bot features.

LAWS OF THE GODS

Zeus resides in the heavens, gathering favor to unleash his mighty thunder, while Poseidon rules below, calming the waters. However, when Zeus unleashes his power, beware, for Hades awaits the first to flee.

4% TO ZEUS

The mighty Zeus rests on his throne, ready to strike down and buy back from those who would challenge Olympus's legacy. 4% of all transactions are used to fund the buy back power of Zeus.

4% TO POSEIDON

With each trade, 4% is added to the liquidity pool to calm the waters. But, to keep balance and order in Olympus, excess liquidity above 25% of the total market cap will be paid to Zeus as tribute, lifting Olympus back to its proper place in the heavens, the first dynamic liquidity generation of its kind.

4% TO PLUTUS

The God of Wealth, Plutus, bestows wealth upon the worshipers of Olympus. He then rewards their faith in the omnipotent Zeus. 4% of each transaction will be converted to BUSD and automatically sent to the wallets of the followers of Zeus.

2% TO FAVOUR

In order to further explore the fullest potential of Olympus, 2% will be sent to a wallet as favour for new development and marketing initiatives, controlled by the gods themselves.

HADES TRIBUTE

Having been thrown out of Olympus, betrayed by his own family, Hades rules the underworld, feeding on the souls of the lost. After each buy back, transaction fees for sells are doubled for thirty minutes, descending to the original rate with each minute.

ETHERIAL DISCOVERIES

🔑 LOCKER OF ANANKE 🔑

First of the rune's uncovered by the explorers of Olympus, this will allow projects to lock their liquidity in an easy and transparent way.

WHEEL OF KHRONOS

The second rune uncovered allows projects to vest tokens for team, influencers or anyone of their choosing to have them automatically locked and doled out based upon a pre-defined time frame.

TALES FROM THE PANTHEON

As the legend goes, BogTools, Gabe, and Bingus together searched far and wide for the Myth of the Buyback Token. To their dismay, they found only pretenders. Thus Jonathan Bog, founder of the mighty Boggled corporation, took it upon himself to rip open the doors of Olympus and share the power of the gods. Along with the marketing prowess of the Gabe team and the integrity of the Bingus team, Olympus is ready for its trip to visit Selene (Goddess of the Moon).
